

World Class Cue Care

...the latest in cue maintenance

SHAFT & FERRULE CLEANER One-Step Cleaning System

JNJ's World Class Cue Care SmartWipes® are high performance presaturated wipes that offer cue cleaning, shaft treatment and polishing solutions where and when you need them. The Pool & Billiard industry does not have a more effective, easy to use method of cue care.

PRODUCT DESCRIPTION:

World Class Cue Care Shaft & Ferrule Cleaner is a high performance presaturated wipe that lifts chalk, oil and grime from your cue shaft and ferrule all in one easy step, leaving it clean and smooth. This exclusive chemistry is a laboratory tested formula which contains no harsh chemicals that will dry-out wood or damage your cue shaft or any ferrule material. Unlike other cleaners, World Class Cue Care Shaft & Ferrule Cleaner is easy to use. Each wipe contains safe, deep cleaning agents and conditioners that dry rapidly while you clean your cue shaft, without raising the grain of the wood. No more paper towels, small expensive bottles or messy powders that raise the grain. Just pull out a wipe and start cleaning.

PRODUCT HIGHLIGHTS:

- * Cleans: Cues and Ferrules
- * Easy to use, One-step cleaning system
- * Presaturated wipe will not scratch or damage cue
- * Packaged in a convenient dispenser
- * Fast drying formula will not raise the grain
- * Prevents the sticky buildup that develops over time
- * No more paper towels, small expensive bottles or messy powders

DIRECTIONS FOR USE:

Just pull out a presaturated wipe and vigorously wipe down the entire shaft with the wood grain. Watch layers of embedded chalk and grime instantly transfer to the wipe. Move to a clean area of the wipe and continue cleaning until wipe appears dry. Heavily soiled cue shafts and ferrules may require more than one wipe. For optimum results, now that your shaft is clean, burnish the shaft with your favorite burnishing tool to seal the wood grain and further enhance the feel of your shaft. A clean cloth, a piece of soft leather or the micro-grit cue papers available in today's market place work great! Avoid sandpaper. Burnishing can be followed with a final polishing.

HAZARD RATING: Fire: 3, Toxicity: 1, Reactivity: 0 **HAZARD CLASS:** Flammable Liquid
IN ALL CASES REFER TO THE MATERIAL SAFETY DATA SHEET (MSDS)
